Guide Formulations - Homepage - SCS Formulate

Starting Formulations. Epoxy resins are generally combined with curing agents, modifiers and other additives into formulated coatings, adhesives, compounds or mixtures which deliver the needed performance for a specific end use or application.

Starting Formulations - Hexion

Thickening Make the job easy with our thickeners that help to ease the application of dry mortars: Casucol™ and Opagel™. They facilitate mixing with water, the application, and the various smoothening stages. Casucol™ and Opagel™ reduce trowel stickiness and increase paste adhesion to the substrate. They give non-sag and anti-slip properties to plasters, fillers, and tile adhesives. As ...

Bring excellent workability to your dry mortar formulations

in dry-mix formulations are cellulose ethers, plasti-cizers, thickening agents, air entrainers, defoaming agents and hydrophobizing agents. Of course this list is not exhaustive and others might be added. As for the other
additives, too, to incorporate the hydrophobizing agent into the drymix mortar, it is ad-
